WHO WE ARE

Dust Control Environmental, (DCE), manufacture, supply, and install high-performance dust and fume extraction systems, tailored to meet the demands of modern industry. Founded in 2010 by Managing Director, Martin Gill, DCE has grown into a trusted name across the UK, now offering one of the most extensive ranges of dust collectors in the country.

Driven by innovation and backed by a highly skilled team, our in-house manufacturing capabilities allow us to deliver bespoke solutions with precision and efficiency. From concept to completion, our in-depth industry knowledge ensures every system we design and supply exceeds expectations.

WHAT WE DO

At DCE, we specialise in the design, manufacture, and delivery of high-performance dust and fume extraction systems tailored to meet the unique operational needs of each client. Every system is engineered, fabricated, and assembled in-house, ensuring complete quality control from concept to completion. Whether you require supply-only or full installation, our experienced contract teams are equipped to deliver seamless integration into your facility.

But our commitment doesn't end at installation. Through our dedicated Aftermarket Department, we offer ongoing support with comprehensive testing, maintenance, and spare parts package – helping you stay compliant, efficient, and confident in your operations for years to come.

WHY EFFICIENT DUST EXTRACTION IS ESSENTIAL

In the UK, stringent regulations such as COSHH (Control of Substances Hazardous to Health) require businesses to limit workers' exposure to hazardous airborne particles. Failure to comply can result in legal penalties and serious health risks, including respiratory illnesses such as occupational asthma and lung disease.

THE BENEFITS OF INVESTING IN A QUALITY DUST EXTRACTION SYSTEM

- **Regulatory Compliance**
Meeting UK Health & Safety Executive (HSE) standards
- **Improved Workplace Safety**
Reducing the risk of respiratory conditions among employees
- **Enhanced Productivity**
Providing a cleaner work environment for better operational efficiency
- **Environmental Responsibility**
Energy saving & lower emissions contributing to sustainability goals

SECTORS WE WORK IN:

Woodworking

Food & Beverage

Foundry & Forge

Surface Prep & Fabrication

Brick & Block

Waste Recycling

PRODUCT RANGE

- Cartridge filters
- Bag filters
- ATEX options
- Mist collectors
- Wet & dry booths
- Vacuum systems
- Welding extraction

You can view the whole range at www.dustcontrolenvironmental.com

DCE can also supply a range of biomass burners, shredders and silo storage for sustainable waste collection, separation and reuse. Don't forget – we install (including ducting) and commission – providing an all-round service.

LOCAL EXHAUST VENTILATION (LEV) TESTING SERVICES

DCE offer a nationwide LEV Testing Service conducted under the assurance of our P601–Certified Engineers. After a test, DCE will provide a detailed report on the test result.

If any LEV system fails to meet compliance, the report will clearly state the reason for failure and include a comprehensive list of recommended remedial actions – ensuring your system can be swiftly brought back into full compliance.

PARTS & ACCESSORIES

- Full range of replacement filters
- Ductwork
- Essential components
- Parts for other makes of dust control machinery

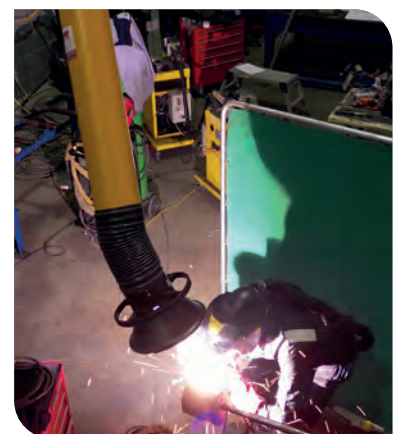

MAINTENANCE PACKAGES

Save time, money and ensure performance with one of our maintenance plans tailored to your needs.
