LEV Maintenance is Essential

If you are managing LEV systems you can think of Aftermarket care, such as testing, maintenance and replacing parts, as an essential exercise in remaining compliant. It ensures sufficient protection of the workforce and ensures your LEV systems keep running efficiently long after installation. Note, it is mandatory under COSHH & HSE regulations to carry out a compliant testing and maintenance regime at no more than 14 months intervals.

Customer Testimonial

"Every experience I've had on a site with the DCE LEV testing team has been impressive, reliable, friendly, experienced and very professional"

James - Straaltechniek

A thorough LEV testing and maintenance regime offers many benefits:

- ✓ Legal compliance to COSHH & HSE requirements.
- ✓ Enhanced employee health & safety, protecting against hazardous airborne substances.
- ✓ System efficiency with regular servicing keep systems working at peak performance, for longer.
- ✓ Operational cost savings minimising expensive breakdowns, emergency repairs, and productive downtime.
- ✓ Performance verification with LEV testing ensuring the system still meets its original design specification and therefore continuing compliance.

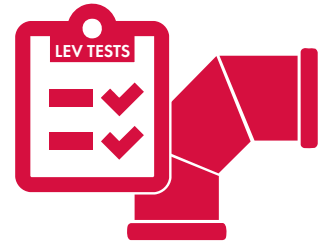

Why Use Us?

Sign up for Easy & Compliant LEV Care with DCE Services

LEV Tests

As well as carrying out TExT (Through Examination & Test) our P601 accredited test engineers will issue not only a full report but a remedial and action list. These indicate the areas that require attention to return the LEV system to compliance.

Tailored Maintenance & Service Plans

Continual LEV support is given with maintenance plans tailored to customer requirements, dependent on machine and processes.

Parts & Spares

We hold stock for quick delivery of DCE parts. Other brands of spares are also readily available.

DCE OneHub

An automatic membership benefit for customers. It provides easy 24/7 access to important LEV test documentation as well as quotations, reports and critical part lists. For our customers it's a great way of demonstrating a comprehensive LEV test and maintenance regime.

One-Stop-Shop

With a comprehensive range of aftermarket services, DCE can be a reliable one-stop-shop for all requirements. From LEV testing to servicing, remedial work, fitting and parts there is no need to look elsewhere.

The Complete LEV Aftermarket Service

Be finance savvy – Take advantage of DCE schemes

We're committed to building lasting relationships with our customers by offering tailored incentives that support affordable and efficient LEV maintenance.

Multi-Site Cost Savings

Many of our clients operate multiple sites with LEV requirements. When we're invited to service two or more locations, we're pleased to offer a more cost-effective package.

Loyalty Schemes

The longer our clients support us with their business the more we can provide discounts for parts and servicing. Whether you have been a customer of ours for 3, 5 or 10 years we can show savings accordingly. Likewise for new customers we can discuss long term contracts for added value.

Referral Schemes

We are proud of the professionalism we approach each customer and the quality of services that we supply. This has often been validated by clients recommending us to other businesses. If you refer a business to us we are happy to reward with a discounted or free service.
